Course

FIN 210 - Principles of Finance

This course introduces students to the fundamental principles and concepts of finance and financial management, and their applications in the corporate and investment worlds. Students will develop an understanding of the analytical tools used by finance professionals, including time value of money, valuation, and financial statement analysis. Topics include financial markets and institutions, risk and return, corporate capital structures, and the role of current financial news in decision-making. Emphasis is placed on applying theory to practice through analysis of market data, case studies, and problem-solving exercises.

Grade Basis: L
Credit hours: 3.0
Lecture hours: 0.0
