Health Care Administration

Bachelor of Science in Health Care Administration - Bachelor of Science in Health Care Administration

Type:Major

The Bachelor of Science in Health Care Administration is designed to give students knowledge and experience in the area of health care. Building on general education courses, the curriculum provides students with broad knowledge of health care policy, financing, leadership, and management skills needed to function in a health care delivery system.

Student Learning Outcomes of Program

- Apply comprehensive management approaches to perceive, assess, and formulate competent business and organizational decisions in the health care industry.
- Analyze financial conditions within the health care industry utilizing accounting, economic, and financial principles to create managerial plans, make decisions and develop solutions to business problems.
- Explore the theoretical framework of human resource management and the importance of employees as a significant resource to an organization's structure.
- Examine various business software application programs and their use and impact in business.
